SUMMARY

Information Security professional with hands-on experience in IT infrastructure, cloud administration, and cybersecurity. Currently serving as Associate IT Information Security at RM Network, managing Microsoft 365 administration, cloud backup systems, endpoint security, and full-stack web development. Experienced in AWS cloud security, Docker containerization, vulnerability assessments, and network security. Bachelor's degree in Information Security with CEH training. Proficient in Python, JavaScript, SQL, and API integration with proven ability to design and implement secure IT infrastructure solutions.

WORK EXPERIENCE

Associate – IT Information Security *Nov 2025 – Present*
RM Network, Amman, Jordan

- Administer Microsoft 365 environment for 15+ users, managing accounts, licenses, Teams, OneDrive, SharePoint, and mail flow configurations
- Lead development of GAIBE AI web application, building frontend (React), backend APIs, database architecture, and third-party integrations
- Manage Synology NAS server and C2 cloud backup infrastructure, ensuring 100% data integrity and disaster recovery readiness
- Conduct security assessments on endpoints and network infrastructure, implementing security policies across all devices
- Provide Tier 1 and Tier 2 help desk support, resolving 20+ technical issues weekly for hardware and software
- Manage database operations and API integrations connecting third-party applications to organizational web platforms
- Preparing Microsoft Defender deployment for endpoint protection and email threat security monitoring

IT Systems & Cloud Administrator Intern *Aug 2025 – Oct 2025*
RM Network, Amman, Jordan

- Designed and implemented enterprise backup infrastructure using Synology NAS and C2 cloud backup solutions
- Administered Microsoft 365 tenant, configuring user accounts, security policies, and collaboration tools for organization
- Configured and deployed 10+ new laptops with standard OS images, drivers, security software, and user applications
- Contributed to GAIBE AI project development, implementing frontend features and backend API integrations
- Established IT security baseline for organization, implementing endpoint protection and access control policies
- Provided daily IT support and help desk services, troubleshooting hardware, software, and network connectivity issues
- Monitored backup integrity and system health, ensuring 99.9% uptime for critical infrastructure

Cybersecurity Intern *Mar 2025 – Jun 2025*
Arab Bank, Amman, Jordan

- Gained hands-on experience with AWS cloud security tools including EC2, S3, and IAM access management
- Implemented Docker containerization to create isolated testing environments for security assessments
- Contributed to access control configuration projects and developed automation scripts for security operations
- Participated in vulnerability assessments and internal penetration testing using enterprise security tools
- Documented security findings and reported vulnerabilities to team leads, improving remediation workflows

EDUCATION

Bachelor of Science in Information Security *Oct 2021 – Jul 2025*
University of Petra, Amman, Jordan

- Coursework: Network Security, Cryptography, Risk Management, Ethical Hacking, Digital Forensics

General Secondary Education Certificate (Scientific Stream) *2021*
National Orthodox School, Amman, Jordan

CERTIFICATIONS & TRAINING

Certified Ethical Hacker (CEH) Training – 40 Hours *Jan 2024 – Feb 2024*

- Completed hands-on labs in network scanning, system hacking, vulnerability analysis, and penetration testing
- Practiced real-world ethical hacking techniques using industry-standard security tools

PROJECTS

GAIBE AI – Generative AI Bible Engagement Platform

- Full-stack web application for AI-powered Bible study, chat, memorization, and progress tracking
- Built responsive frontend with React, RTL Arabic support, dark/light theme switching, and mobile optimization
- Developed backend APIs with Google Gemini AI integration, database architecture, and third-party service connections
- Technologies: React, JavaScript, Python, REST APIs, Google Gemini API, PostgreSQL, Heroku

AI Password Cracker

- Developed AI-powered tool using pattern recognition to generate passwords based on user information
- Implemented password breach detection to promote cybersecurity awareness and stronger password practices
- Technologies: Python, HTML, CSS, JavaScript, PHP

TECHNICAL SKILLS

Cloud & Infrastructure: Microsoft 365 Administration, AWS (EC2, S3, IAM), Synology NAS, C2 Cloud Backup, Docker, Microsoft Defender, Active Directory

Security: Vulnerability Assessment, Penetration Testing, Endpoint Security, Network Security, Access Control, Security Monitoring, Incident Response

Programming: Python, JavaScript, Java, SQL, PHP, HTML, CSS, React, REST APIs, API Integration

IT Administration: Help Desk Support, System Administration, Laptop Configuration, Backup Management, Network Troubleshooting, User Account Management

Tools: Microsoft Office Suite, SharePoint, Teams, OneDrive, Git, Heroku, Adobe Premiere, Adobe Photoshop

LANGUAGES

Arabic: Native Fluency

English: Professional Working Proficiency (Speaking, Reading, Writing)
